

# Content Generator 2010

for SharePoint 2010

Content Generator is a **professional site provisioning** tool that allows the automatic creation of SharePoint content and structure including list items, documents, lists, pages, sites and sub site collections. Content Generator gives your software engineers the ability to develop in a - **real world** - environment which is similar to your customers' information architecture. Development and quality assurance can be done in a more efficient way.

## Business value

As an IT service provider focused on intranet-, extranet- and internet platforms based on SharePoint you have software engineers creating solutions for your customers. Content Generator adds **additional benefit** to your software development process because it enables your software engineers to develop with real world content, meaning content which is similar to your customers' **information architecture**. You create it once with an easy to use editor and reuse it on different SharePoint farms, e.g. development-, integration- and staging environment and / or by different software engineers.

## How it works

Connect to your SharePoint site collection in

order to get site-, page- and list templates. Afterwards create a content hierarchy either by manually creating every node or by copying entire nodes.

You can **re-use html** from any web site as your sample content and paste it directly to an element in the hierarchy. Text, DateTime, User and RichHtml fields can be filled with content during creation.

## Additionally

Create large quantities of content (list items, documents, lists, pages and sites) either by element or set a global value for all elements.

The application supports **logging** of informational events and errors and can be run without installation.

## Software requirements

- ✓ .NET Framework 3.5
- ✓ SharePoint Foundation 2010
- ✓ SharePoint Server 2010

## Target audience

- ✓ Developer and architects
- ✓ Project manager

## Key benefits

- ✓ Real world development
- ✓ Save time and money
- ✓ Easy to use
- ✓ Jobs creating content
- ✓ Large quantities of content
- ✓ Check-in and approval
- ✓ Logging
- ✓ Portable
